

SecDevOps: Cloud Security Jumpstart

Qwinix experts will work to determine the current security posture and initial security remediation of identified weaknesses within Google Cloud environments. We audit your current Google Cloud architecture and identify areas to improve your security posture.

The Process

SECURITY POSTURE AUDIT

We review your current configurations and platform controls, provide detailed recommendations, and present best practices to reduce risk and mitigate common threats to your environment.

CLOUD SECURITY

Qwinix experts will assess your current architecture to evaluate organizational security and provide recommendations.

SCC & FORSETI IMPLEMENTATION

Production-ready implementation of Security Command Center and Forseti followed by audit report and workshop.

SUPPORT AND GUIDANCE

Each engagement concludes with a review and evaluation. Qwinix experts are here to guide you along your unique security journey – offering key insights and guidance around a SecDevOps path that's right for your organization.

Highlights

Access Controls

- » IAM
- » Google Workspace
- » 2SV, OKTA, Ping, etc.
- » Security processes
- » Structure: Organization, folders, projects, resources

SCC & Forseti

- » Implement and test
- » IAM Role Config.
- » Cloud Storage Bucket
- » Required add-ons
- » Access Management
- » Log audit
- » Findings Report
- » SCC Workshop

Data Security

- » Encryption key mgmt
- » Cloud Storage security
- » BigQuery security
- » Cloud SQL security
- » Data Loss Prevention

SecDevOps: Cloud Security Jumpstart

As a Google Cloud Platform Partner, Qwinix leads every security engagement with Google Cloud best practices. Our team of highly-certified Google Cloud experts will work with your team to understand the best practice approach to managing a secure cloud environment – ensuring privacy and compliance.

001 / THE CHALLENGE

Cloud services are being created and destroyed every minute. As new threats emerge, it can be hard to manage defenses. How do you keep your environment secure while staying abreast of the latest security solutions?

002 / THE SOLUTION

Working with a Google Cloud Platform Partner ensures that you are working with the people that know cloud security the best. We'll work with you to leverage different controls to manage your secure and expanding environment.
